

Reduce Stubble Damage To Your Tires With The Original STALK STOMPERS

May Wes, recognized Ag industry leader in stalk leveling devices for tractors and combines, continues to add to their STALK STOMPER product line-up.

May Wes Tractor STALK STOMPER

May Wes offers Tractor STALK STOMPER products for multiple tractor models for various farming practices:

- Applications include planting, tillage and all other field usage
- Tractors with floatation tires, row crop tires and tracks
- Provides choices ranging from complete kits of major brands to the “configurable” build-your-own solutions

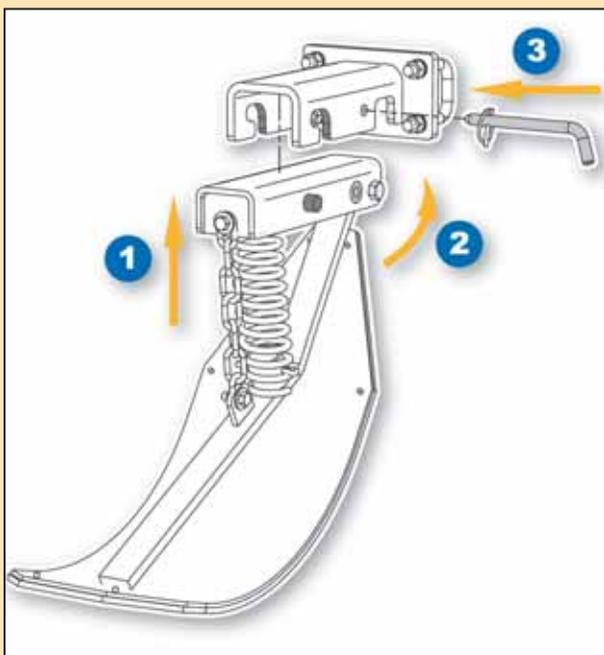

The Tractor STALK STOMPER hydraulics can be operated independently or automatically from an implement line.

For John Deere users, May Wes provides an optional Automatic Lift Switch to raise the stalk stompers automatically whenever the tractor is put in reverse.

About Quick Disconnect STALK STOMPERS For Corn Heads

May Wes STALK STOMPERS cover a broad line of corn heads and the Quick Disconnect features a design for ease of installing, adjusting and shoe removal. Because of the popularity of this design, May Wes offers an upgrade package to enable corn head owners with the original Standard mount May Wes STALK STOMPERS to make a practical switch to the new Quick Disconnect design. May Wes provides 9” and 14” wide shoe options for all major corn heads.

Why May Wes STALK STOMPERS?

May Wes lays claim to being the **Original** STALK STOMPER manufacturer with over 30 years of proven experience. The May Wes STALK STOMPER shoe comes with a ¼” thick Ultra High Molecular Weight (UHMW) Poly liner over a thick metal shoe. The poly finish provides an advantage compared to metal because of its non-stick surface and resistance to abrasion. May Wes’s line of STALK STOMPER products are competitively priced and readily available.
