## CANADIAN FIRM AIMS TO FILL "OVERLOOKED NICHE" WITH 4-WHEEL DRIVE "LAURENTIA"

### "New And Different" Farm Tractor

by Mark Newhall, Associate Editor

The first production line models of a "new and different" Canadian-made tractor, dubbed the "Laurentia", will begin rolling off the assembly line next month.

The heavily-built, intermediate to large 4-wheel drive tractor is unique to the market in several ways, says Ed Andrews, of Codrington, Ont., inventor-manufacturer. His new style

tractor is being built in a spanking new factory at Colborne, Ont., and dealers in both the U.S. and Canada had begun taking orders as this issue of FARM SHOW went to press.

"We're not shooting for the market of the 'Big Six' tractor manufacturers just as Mercedes doesn't shoot for Ford's market in the auto industry,"

*(Continued on next page.)*

The 87 hp. "Laurentia" is the first in a new line of intermediate to large 4-wheel drives. In addition, a forage harvester, baler, and combine have been designed to mount on the tractor and will be introduced in the near future.

## IN THIS ISSUE:

- 2 Rubber boards made from used tires
- 3 New "convertible" 7-in-1 farm wagon
- 3 New way to calculate combine losses
- 8 Wood burning car on cross-country tour
- 13 Repair tubeless tires in minutes
- 14 "Hole maker" for big round bales
- 16 Hopper bottoms for older grain bins
- 18 Their "dream house" cost only \$23,800
- 19 Straightening crooked silos
- 21 All-steel "mud wheels" for tractors
- 29 New competitor in "blue silo" market
- 34 Modified Max-Emerge for soybeans
