Slick Way to Scoop Snow or Silage

There's a faster, easier way to "scoop" snow or silage with your tractor loader.

It's the new "positive ejection" bucket from Dohrman Manufacturing, Emerson Neb. Designed to do everything conventional snow or silage buckets will do, it has the added advantage of automatic side unloading. A chain-drive ejector plate or arm moves across the bucket to push the load out either end. The hydraulically operated arm sweeps off a bucket full of snow or silage in less than 3 seconds.

Big advantage of this unique side unloading feature is that it cuts loading time considerably since you don't have to waste time backing up or turning to dump the contents. The high capacity bucket fits most makes

(Continued on next page)

Side-unloading feature saves time because you don't have to back up to unload the bucket each time. Bucket can be equipped for automatic unloading and still retain the regular forward tilt feature.

IN THIS ISSUE:

Tractor-mounted combine • New way to seed small grains • World's Largest tractor • Build yourself an unloading bridge • New truck bed grain dryer • Owner's report on Russian tractors • Bale compactors catching on fast • Rent-A-Tree • Incubate your own chicks • Half tracks for combines • Circle plow • Weed sled.
