

“Trap Eliminated My Backyard Moles”

By Jim Ruen, Contributing Editor

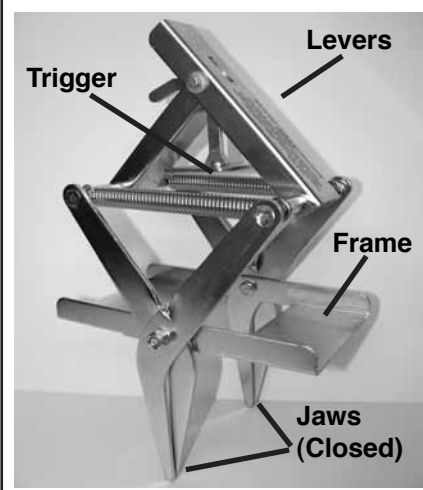

“The EasySet Mole Trap® does the near impossible. It actually kills moles, time after time. In fact, I went from no hits in mole control to four - for - four with the new trap.

“I have yet to have an unsatisfied customer,” says Bob Bruno, distributor of the trap. “I had one woman tell me she had never found a trap yet that worked. I told her to take one and try it. If it didn’t work, send it back. Instead, she sent me a check for four more for friends.”

“Like that customer, I had never met a trap or bait that did the job, not that it’s an easy job to do. Moles are fast, moving 80 ft./min. in an existing tunnel. Researchers say they can dig new tunnels at the rate of 18 ft. per hour or as much as 150 ft. per day.

“When Bruno showed me the \$34.95 trap at a farm show, I was skeptical. I did like the money-back guarantee, something my local hardware store wasn’t about to give me on their traps.

“My first few tries were dismal failures. I called Bob, and he gave me a few pointers. Most important was to make sure the trigger mechanism was directly over the tunnel. Because what happens is that when the mole comes back to open the collapsed tunnel, he pushes upward, triggering the trap.

“Other smarter mole trappers would have instinctively known these things but I was happy to have Bob’s advice.

“I headed back to the yard, carefully stepped down only a section of a main tunnel that would be under the trap trigger. Then I centered the trap, which looks like two scissors inside a steel frame. I stepped down on the footrest, checking the trigger mechanism as it went down to be sure it rested directly over the flattened tunnel.

“The next day I checked the trap and it had been triggered. I got my mole. A few days

later, another mole entered the area. He too made a one-way trip to the nearby woods.”

Proudly made in the U.S.A., the EasySet Mole Trap® is the only patented mole trap that is backed by Nuisance Wildlife Control Products limited lifetime warranty and their solid guarantee that this trap will catch moles or your money back!

The Right Plastic For Your Job!

A New York manufacturer says it’s doing big business with a variety of plastic products. Most are waterproof and are easy to handle and install. Here’s a rundown on North Brook products:

New! Dura Panel is an innovative, rugged, attractive, interlocking, snap together PVC panel available in 3/8 in. thick and 12 in. width systems. The tongue and groove design has no exposed fasteners or joints. It is perfect for parlors, milk houses, farm offices, and other work areas. Some of the great features of Dura Panel includes: easy to clean, maintenance free, resists rot, mold, mildew, and chemicals. It is rigid and light weight making it a snap to install. Dura Panel is available in white, with matching trim and carries a 10-year warranty.

Another useful plastic sheet is the **DuraCor Lite** specifically designed as a lightweight, structural HDPE board with a webbed, corrugated substrate and a smooth surface. The DuraCor Lite has excellent chemical resistance, is easy to clean, will not rot or corrode, and can withstand high-pressure washing. It is available in 4 ft. x 8 ft., 10 ft. or 12 ft. sheets. The DuraCor Lite is 5/16 in. thick and can be used in milk

houses, commercial food preparation areas, wash bays, and green houses.

Poly Plywood has been designed to replace traditional wood sheathing. It forms a strong and rigid sheet and can be used in areas where traditional materials rot or splinter. Poly Plywood machines more easily than wood and can be fastened by screws, nails, and staples. Poly Plywood is available in 1/2 in. and 3/4 in. thickness in 4 ft. x 8 ft. sheets.

New! Ag-Tuff ceiling panels are strong high impact PVC panels that are naturally resistant to chemicals and perfect for use in your most demanding applications including hog barns, dairy farms, poultry farms, meat packing, storage sheds, industrial buildings and many more. These light weight panels are a breeze to handle and require no special equipment to install. Ag-Tuff panels have a corrugated square wave and come in 26 in. and 38 in. widths and lengths up to 20 ft. Thickness is .032 inch. Ag-Tuff comes in bright white and has a 10 year warranty.

Plastic Plywood: No painting required but paint can be applied without peeling or chipping because the board is waterproof. Sheets range from 3/8 inch to 1-1/8 in. thick. Plastic Plywood is readily available in 4 ft.

Plastic plywood comes in 4 by 8-ft. sheets that can be used like wood.

by 8 ft. sheets. This product works great for hog, chicken, dairy or horse barns, dividers, walls, exterior sheathing or paneling, bulkhead panels for van trailers, children’s outdoor play-houses, marine boat sheds, docks, piers, etc.

HDPE: Comes in sheets and rolls. The rolls are of varying thickness from 1/8 in. to 1/2 in., widths from 12 in. up to 72 in. and lengths of more than 100 ft. HDPE is also available in 4 ft. by 8 ft., 10 ft. and 12 ft. lengths. HDPE has been used for lining mangers, bunks, wagons, spreader beds, milk houses and parlor walls, etc.
