

Air Reels Make Every Bean Count!

In today's marketplace, maximizing your harvest is more valuable than ever. Improve the efficiency of your operation, by adding a Crary Air Reel to your harvester today. A continuous stream of high-velocity air quickly feeds crop back

to the auger. This minimizes shattering and reduces the amount of header loss. At harvest time, every second counts and in today's market every bean counts. You can count on Crary.

Crary Wind System (CWS)

Whatever combine you work with, and whatever standing small grain or bean crop you're harvesting, the addition of a Crary Wind System (CWS) will add bushels to the hopper even under the most challenging conditions.

Reader Inquiry No. 130

KingKut

KingKut increases crop feeding capabilities, expands cutting surface and reduces sickle weight.

Reader Inquiry No. 131

GOLD'NCUT

This cutting system treats your crop like gold. It offers less crop shatter, double-action cutting and longer wear life.
