

Amazing Loader-Mounted Tee-Post Driver Pulls Posts, Too

Putting 60 Tee-posts into hard ground by hand can easily take all day. But with the Bucketdriver.com Tee-Post Driver System, you can do it in an hour or less. The amazing system is so effective and easy to use that after buying it from Bucketdriver.com you'll find yourself wanting to hide it from your neighbors.

This year, Bucketdriver.com introduced an optional add-on attachment that also allows the Tee-Post Driver System to pull posts quickly and easily.

Bucketdriver.com's system consists of an all-directional swivel that simply attaches to a loader bucket. A Driver Barrel hangs from the swivel. The swivel design makes it easy to use gravity to line a post up straight for perfect alignment.

Just load your bucket up with T-posts. Grab the first post to be driven and load it into the Driver Barrel by sliding the post up into the barrel past the auto-latch that holds it in position. Then use the loader to push the post into the ground. You just tilt the bucket slightly as you're pressing down to maintain a level post. After driving the post in and before raising the bucket, reach into the bucket and grab the next post. Then raise the Driver and bucket, leaving the post in place, and reload the Driver barrel with the new post. Two people can easily drive a post every minute.

The Tee-Post Driver System makes it easy to lift a post up over a fence and drive it in from the other side, something no other post driver can do.

The Tee-Post Driver is priced at just \$119.95 for the Driver 5 model. It attaches

Tee-post driver hangs from loader bucket. Post slips into driver barrel, which swings freely on swivel, allowing gravity to align posts.

to the bucket with either a universal clamp that bolts on anywhere with 2 bolts (\$19) or an U-shaped clamp that fits over the front edge of the bucket and attaches with 1 bolt (\$25).

An earlier model, called the Driver 4, sells for just \$69.95. It has a wider opening that allows it to drive used posts that have been flattened out on top.

The optional post puller attachment, which fits both the Driver 5 and Driver 4 models, sells for \$30. It attaches to the Driver Barrel and uses a metal pin to lock

New post puller attachment consists of a pin that locks onto fence post notch so that posts can be pulled quickly with driver.

onto one of the top notches on the post before pulling. Posts come out as fast as they go in.

You can see a video of the Tee-Post Driver at work in the field on YouTube by searching "Bucketdriver 2010". Wholesale prices available for dealers.

Squeak Leads To Oil Discovery

My husband and I accidentally discovered ULTIMATE penetrating and lubricating oil when our pickup developed a loud squeak as we traveled through the Bakken oil field region in western North Dakota. The oil caught our attention at the Wiliston NAPA store because it was both a penetrating and lubricating oil. And it was a Pride of North Dakota product, manufactured in Dickinson, N. Dak.

Our first use was to open the filler plug of the rear end to check the oil level. The plug was rusted tight on our 6-year-old pickup. After spraying ULTIMATE on it, we ended up waiting a day in order to get the right size tool. It loosened on the first try. My husband added oil, and then sprayed ULTIMATE on the U-joints, knuckles and other parts, and the squeak disappeared. Later we took the truck to

a mechanic, who changed out one of the U-joints.

I was curious about the oil's origins so I called the number on the can. Turns out the manufacturer, GW Enterprises, is a family business. Fayette Heidecker explained that her husband, Gary, developed the product back in 1992, working with local mechanics. They worked with I-K-I Manufacturing in Wisconsin to put it on the market.

"It's a petroleum-based product," Heidecker says. "It's unique because it's both a penetrating and lubricating spray."

ULTIMATE oil eliminates squeaks, frees rusted bolts, nuts, and parts and can also be used to lubricate and protect.

Though the target market is industrial and equipment, other buyers – including many women – use it for a variety of things including electric razors, sewing machines,

squeaky garage doors, frozen locks and sporting goods.

"The can lasts too darn long," Heidecker laughs about the product that retails for about \$7.99 "You don't have to use much per application. It's foamy so it penetrates right away."

The Heideckers have large customers including Petro Hunt LLC and the N. Dak. State Highway Department. They personally contact dealers in communities to find new retailers, but are open to calls from potential distributors.
