"CUTS FUEL, TILLAGE AND LABOR COSTS IN HALF"

You'll Like This New "Til-Plant" Rig

Harold Johnson, Editor

Farmers who saw it were generally agreed that the "hottest" new machine unveiled at the 1980 Farm Progress Show near Nevada, Iowa, was the "once-over" Kinze Til-Planter from Kinze Mfg., Williamsburg, Iowa.

Designed and patented by Illinois farmer Vince Zimbahlen, of Newton, it combines planting, tilling, fertilizer application and chemical application into a once-over trip.

"We figure this rig can cut fuel, labor and tillage requirements 50%," says Zimbahlen. Instead of a driver, tractor and disk operating side by side with another operator, tractor and planter, this unit combines the entire operation so one driver with one rig does the entire operation in a once-over trip across the field." Key features include:

(Continued on next page.)

Rear-mounted 3 pt. hitch lets you put 6 or 8 corn planter units — or a 3 pt. drill for soybeans or small grain — behind for once-over tillage, planting.
