

STX Idler

MT Idler

John Deere Idler

“Kile® Clear View® Caps” are designed for rubber track tractors. They let you see the level & clarity of the oil in idlers and rollers.

Kile® Clear View® Caps For Rubber Track Tractors

The patented Kile® Clear View® Caps for rubber track tractors used in farming and construction are designed to replace OEM steel caps. Operators can easily see the level and clarity of the oil in their idlers and rollers making it simpler to ensure that proper oil levels are maintained.

This injection-molded product is made from scratch-resistant, UV-protected polymer that withstands extreme temperatures and high impact without breakage. Kile® Clear View® Caps are made in the USA and come with a 5-year pro-rated warranty. Each kit comes complete with idler & roller caps, necessary hardware, and installation instructions.

Clear View® Cap Kits for all rubber track tractors are available for Case IH STX/

9300 Series Quad Trac, and Trac Combines, AGCO MT 700/800 & Cat 35/95, Lexion / Claas Track Combines, John Deere 8000 & 9000 T & RT Series, and Griptrac Tracks (Griptrac is a registered trademark of Gilbert & Riplo Co. Corp. USA).

Owners/operators are invited to visit Kile Mfg.'s website for information and prices for the kits, individual caps, product update, and new products. A continually updated dealers list can be viewed on the website. Brochures and more information can be obtained upon request.

Rock Kits For Case IH Combines

If you own a Case IH combine, you'll be interested in this new rock beater that's designed to replace the existing rock trap on 60, 80 and 88 series combines.

The new rock beater has a spiral shape which ensures that 70 percent of the opening in the beater is always open so the crop can flow smoothly into the rotor, virtually eliminating back feeding.

The factory rock beaters on Case IH 60, 80, and the new 88 series combines all have a straight design which reduces how much time the opening in the beater stays open. It's like the

difference between a door that opens and shuts all the time, and a revolving door that's continuously open.

The beater opens up the feeding area so you can get more crop material into the rotor and still have good rock protection.

Sells for \$1,175 plus S&H

“Peel And Stick” Engine Preheater

The “peel & stick” Universal Preheater attaches to the bottom or the side of the oil pan and converts the housing into a heat transfer element. It warms the oil without burning it making cold starts easy. It can be used on gearboxes, transmissions, transfer

cases, water tanks and even bulk oil tanks.

The Preheater plugs into any 120 or 240

volt outlet and consists of a thin silicone fiberglass pad containing a metal grid. To install it, you clean an area on the bottom or side of the oil pan and press the pad onto it, then use silicone to seal the edges of the pad and place a flexible ceramic insulation pad over it. It is available in several models depending on the lube capacity. A 50 watt unit sells for \$44 and a 350 watt unit sells for \$133.

NEW: Stop Fuel Gelling At The Filter

The Universal Filter Preheater is designed for diesel fuel filter housings. It wraps around the filter housing and reduces or eliminates the possibility of cold weather fuel gelling stopping the engine. It is easily removable and transferable and is wired for your choice of: direct current or alternating current or a convertible model combining dc and ac. A standard Universal Fuel Filter Preheater is priced at \$138.
