## “Made It Myself” Ideas Born In Farm Workshops

**Field Ditcher Made From Silo Blower** - Kansas farmer Elwin Harder cut off the bottom of a silo blower to make a 3-pt. mounted low-cost ditcher. He uses it to drain surface water off fields. See page 2.

**New-Style Posthole Digger** - What makes Jeff Vaughter's new posthole digger different is the pivot point a couple feet up from the jaws. The handles never spread out wider than the hole being dug. See p. 3.

**Tractor-Mounted Calf Catcher** - After a mother cow nearly stomped him to death, Kentucky cattleman Larry Jeffries came up with this calf catcher to fit his front-end loader. The portable corral is equipped with a weigh scale and calf chute. See page 2.
