Latest New Products, Ideas From Europe

Dual Wheel Transport - New trail-behind transport rig hauls duals to field. Duals quick-clamp to hubs on axle and pull down the road behind tractor or combine. In field, duals are raised up on built-in stand for easy removal. (See p. 21)

Bug-Sucking Vacuum - Hydraulic-powered blower-vacuum knocks insects off plants with a blast of air and then sucks them up for disposal. (See p. 23)

New Forage Harvester - Deutz showed this revolutionary new forage harvester, which compresses hay into thin mats, at the recent DLG Show in Frankfurt, Germany. (See p. 22)

See Pages 21-24

IN THIS ISSUE: Ag World

- 3 Farm Show's 15 years old
- 4 Farmer ingenuity at its cost-saving best
- 9 Build-it-yourself air seeder
- 15 3-pt. implement hitch for pickups
- 15 Automatic 3 pt. hitch
- 16 Water tower - fast way to fill sprayers
- 18 Farmer-built inventions from 40 years ago
- 24 3 pt. saw slices up big round bales
- 26 He uses grain bins to dry hay bales
- 28 Pivoting fenders for FWD tractors
- 29 Grease gun made from hydraulic cylinder
- 35 He built his own one-pass tillage tool
- 34 Owner's report on best, worst tillage equipment
