New "Towmobile" for Wide- Front Tractors

A new towmobile introduced by Unverferth Mfg., Kalida, Ohio, makes it easy to tow wide-front tractors — with one or two implements attached to the tractor — behind your pickup. It'll also handle most self-propelled combines.

This low-cost alternative to expensive flatbed trailers is easy to load or unload. With the transport hitched behind your pickup, just turn off the engine, put it in gear and set the emergency brake. You then put down two 4 by 4 wooden blocks and drive the tractor (or combine) onto the transport so its wide front wheels drop into special wheel slots. The tractor axle is secured to the transport frame with a chain. The entire train — pickup, transport, tractor and one or two implements — can travel

(Continued on next page.)

Towmobile behind pickup transports tractor with one or two implements attached.

IN THIS ISSUE:

- Radio-controlled sorting gate • Grease injector for plowing gumbo soils • All-electric tractor • Belt Rail fencing • Lift-out device for stuck vehicles — Loader Gopher for bunker silos • Lightening "sprayer" electrocutes weeds
- New way to make hay
- Airhand silo filler
- Hydrostatic conversion kits for Steiger, Versatile, Wagner tractors.
