Best New Ideas Born In Farm Workshops

Nebraska farmer mounted an engine and drive axle on a pull-type high-capacity grain vacuum, making a maneuverable rig that gets into tight places a tractor and trailer couldn't go . . . see p. 2.

Self-Propelled Grain Vacuum

"Buggy" Runs Between Rows

Narrow bean "buggy" fits between 30 in. rows, allowing the farmer who built it to get into hip-high late season beans. Sloping snout divides thick canopies . . . see p. 3.

Canadian farmer who adapted pull-type sprayer to swather lift arms likes the maneuverability and visibility of the up-front sprayer . . . see p. 2.

"Push Sprayer" Attaches To Swather

IN THIS ISSUE: Ag World
