Exciting New Products Fresh From Europe

Combine-Mounted Round Baler - Baler mounted on back of New Holland combine lets this Italian farmer make big round bales of straw on-the-go as he combines. Combines have plenty of hydraulics to operate balers, he says. (See page 21)

Mini Round Baler - New walk-behind mini round baler makes 22-in. dia. round bales wrapped in netting. Great for baling steep slopes and for smaller operators who can't justify a full-size baler. (See page 22)

Robot Mower Works By Itself - Revolutionary new solar-powered mower works by itself, "grazing" across your lawn like a sheep. You leave it on your lawn all summer and it automatically keeps it at the correct height without any maintenance or attention whatsoever. (See page 21)
