Latest New Inventions Born In Farm Workshops!

Tag-Along Grain Cart

Richard Gidel boosted the grain hauling capacity of his combine by building a tag-along cart that's loaded on the go by a hydraulic-powered auger. "Lets me make a full round in the field without stopping," says the Iowa farmer.

This issue's exciting parade of money-saving farmer inventions starts right here on the cover and continues on the next page. Good Reading!

Drag Made From Old Tires, Fence Panels

A Missouri farmer says this soil conditioning drag takes little power to pull and does a great job breaking up clods and leveling the seedbed. It's made out of old tires riding on top of wire cattle panels.

Front-Mount Mower Built From Old Deere Combine

You've never seen anything like this self-propelled, articulated mower built out of a 7700 Deere combine. Fitted with a 10 1/2-ft. wide up-front mower, it lets the Illinois farmer who built it mow his road banks and waterways quickly and in comfort.
