SWITCHES FROM ROTARY TO CONVENTIONAL Revolutionary New Combine!

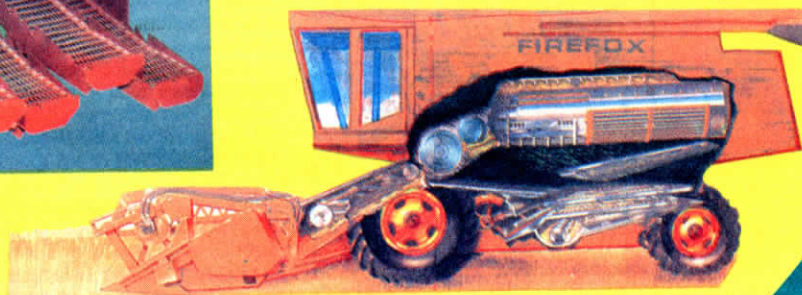

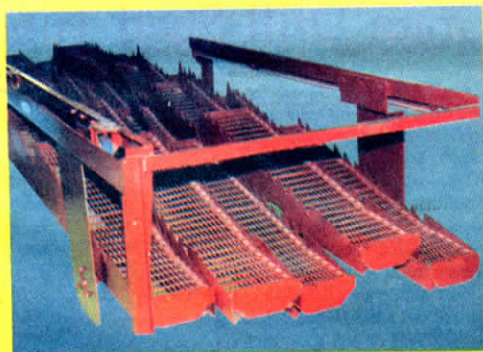

By Mark Newhall, Editor

"It's the most versatile crop harvester ever built," say developers of this revolutionary new combine that can be easily switched from rotary to conventional and back again. Lets you choose the best harvesting configuration for each crop and condition.

The Italian-built "Firefox" combine, dreamed up and manufactured by Rosso Combines Corporation in Larizzate, Italy, was the hottest new product at farm shows in Europe this year and it attracted huge crowds at the Fieragricola in Verona, Italy, where it was first introduced in March (see pages 21-23 for a roundup of other exciting new products from Europe).

What makes the Firefox combine unlike any other harvester ever built is the way the entire cleaning system is mounted on an interchangeable track, allowing you to pull

(Continued on page 22)

First-of-its-kind "Firefox" combine features interchangeable rotary separator (top left) and conventional straw walkers (above left). Both cleaning systems mount on tracks that simply slip in and out of combine as needed. Drawing (above) shows combine with rotary cylinder installed.

IN THIS ISSUE: Ag World

- | | |
|---|--|
| 2 New "double depth" grain drill seed tube | 11 Slick ways to recycle cultivator shovels |
| 2 New way to repair brakes | 21 First-of-its-kind "centrifugal combine" |
| 3 Custom-fit tarps for farm tractors | 21 New lower-cost rubber tracked tractor |
| 4 New "affordable" guidance system | 22 Oval-shaped disc blades more aggressive |
| 8 Rotary hoe grass seeder | 26 Owners' report on best, worst tractors |
| 10 Feed wagon pulled, powered by pickup | 35 Home-built 16 row corn head |
| 24 Minnesota farmer spends \$5,000 to rework brand new \$140,000 Deere combine | |
