

“Permanent” Replacement Seals For Deere 30, 40 Series Tractors

A Missouri machine shop that got tired of replacing leaky load control shaft seals on Deere 30 and 40 series tractors came up with heavy-duty “PERMANENT” replacement seals.

Boling Machine Shop, Lenter, Mo., says Deere’s seals often start leaking after six months or less. Boling has been making heavy-duty replacements for 30 years. The replacements are machined out of steel with Teflon liners, O-rings, or neoprene washers, depending on model. The O-rings, liners and washers can be replaced without replacing the seals. The 4020 seals also fit 4010, 5010, 5020 and some applications of

4000 models.

The 3020 seal also fits 2510, 2520, 3010 and 4030 tractors. A 4520 seal also fits 4620, 7020, and 7520 tractors. This series sells for \$55 a set.

The company also has seals and bushings for newer tractors which include 4440, 4230, 4240, 4320, 4430, 4440 and 6030. They have a wider surface to reduce shaft wear. They sell for \$85 per set. We have also added 50 and 55 series.

We also sell load control shafts for most models, 2950, 2940, 2840, 2850, 2855, 2550 and many others. All seals are guaranteed.

Permanent replacement seals don’t leak like factory seals, says Boling Machine.

3-Pt. Hitch Stabilizer

“It puts an end to 3-pt. hitch sway,” says Ken Klingler, Klingler Mfg., about his new 3-pt. hitch stabilizer for IH 656 to 1586 tractors.

Built from heavy 3/4 by 6-in. plate steel, the hitch blocks bolt into place with no modification of tractor. Hitch arms slide on the outside of the vertically-mounted plates. Spacer bolts hold stabilizer blocks in the correct position for either Cat. II or Cat. III hitches. No holes to drill.

“Without these blocks, IH hitches can sway as much as 3 in. Once installed, hitch arms hold steady as a rock. They won’t move even with the heaviest implements. We have had these units out for over 30 years and the people who have them are truly satisfied. Stabilizers are backed by a

money-back guarantee.”

The hitch stabilizer blocks sell for \$149.95 per set plus shipping. Some models require narrower hole spacing so specify tractor model when ordering.

Klingler also makes crop deflector plates that attach to stabilizer bottom irons to protect tall row crops from damage. They sell

for \$15 a set. Dealer inquiries welcome.

The Best Riding Mower Deck Washer And Heavy Duty Tool Hanger

Grass clippings that accumulate on the underside of mower decks eventually cause an uneven or rough cut that leaves a clumpy looking lawn. Riding mowers cannot easily be tipped for cleaning, and removing the mower deck is impractical. The Riding Mower Deck Washer simply attaches to your garden hose and slides under the mower deck. Within seconds, the multiple water-jet nozzles will wash away grass clippings and debris. Cleans mower decks up to 60-in dia. It’s constructed of heavy duty ABS plastic with no moving parts to break so it will last for years. Measures approximately 40 in. long.

If you need a good, solid home for shovels, garden rakes, trimmers, and such, this Heavy-Duty Tool Hanger is up

to the task. It has four sets of arms that are specifically designed to safely store the big implements, and its impressive 5/16-in. dia. steel rod construction and tough polyester finish make it strong and durable. Holds up to 100 lbs. and measures 11 in. deep by 35 in. wide. Includes hardware for easy installation.

To order go to www.sportys.com/toolshop or call 513-735-9100. Use item number 24102T to order the Riding Mower Deck Washer for \$21.95 each. Use item number 27011T to order the Heavy Duty Tool Hanger, for \$26.95 each, or for two or more the price is \$24.95 each.
