

Jensales Goes “Hybrid” To Bring You Tractor Manuals, Parts, And Decals!

Jensales is going hybrid! No, they don't have a Prius tractor. They're using high-tech media and tools to get you what you need for your vintage tractors. Modern tools to keep your antiques up and running. A real effort has been made to make it easy to find them on Facebook, on your mobile device, and on the internet.

Jensales started with manuals and have grown from there. Order online or by phone, and you still have your choice of old school paper or downloading a pdf manual, and the number and diversity of parts and decals continues to grow. Their parts emphasis is still engine kits, seats, cab interiors, clutches, water pumps, gauges, and decals. They have proven to be the best place to get the parts you need, even better than the local parts store. The manuals they have for nearly every tractor ever made helps them find the parts fast and ensures you get the right parts the first time.

Using service, parts, and operator's manuals to tie it all together, the over 180,000 parts now offered for all your repair and restoration needs is how they help you complete the job. The website (www.jensales.com) and the storefront in Manchester, Minn., are ready to serve.

Jensales high quality reproductions are made from the Original Equipment Manufacturer (OEM) manuals used when the tractor was new. An operator's manual, service manual, or parts manual for your

equipment clearly shows the right way to do any job. Get the parts, but don't forget the manuals and you will have what you need to do the job right.

To get the best bang for your buck, Jensales' deluxe tractor manual kits include all the manuals for your tractor plus a few bonus items like a custom shop rag, serial number reference guide, and even a proper brand decal for your tool box. Kits can also include the electronic versions. There are discounts of up to 40 percent when purchasing both paper and digital versions. Don't see a kit for your make or model? Just email or call the company and they will create one for you. Jensales is fast becoming

the one-stop shop for information and the right parts the first time.

Search the catalog and check out the free research tools on the Jensales website. Their friendly staff (like Kristen and Jocelyn holding the banner above) are always ready to help on their toll-free line. Be sure to visit the Jensales' World Headquarters in Manchester, Minnesota. They would love to see you, and if you mention this article you will receive a free gift.

Bore Under Roads - Drill Shallow Wells

BorZit lays pipe or wire under roads, driveways, barns or any improvement faster, with less effort, and saves time and money!

It eliminates the drudgery of digging and back-filling and the need to tear up concrete, asphalt or roads. You can also install well points, drill shallow water wells, bore through dams, or develop springs. The system also bores post holes, cleans drain lines, or opens culverts.

BorZit is powered by a 1/2-in. drill. A water hose is attached to the ball valve, providing water to lubricate the tool and moisten

the soil ahead of the bore (not much water is needed.) Cuttings are compressed into the sides of the hole by the rotation of the bit.

The bit is attached to a length of 3/4-in. steel pipe. Add additional lengths of pipe until the bore is completed. On horizontal bores, remove the bit and attach what is to be left in the hole – PVC, poly or galvanized pipe, conduit or cable to the drill pipe. As the drill pipe is pulled out, the pipe or cable to remain is pulled back through the hole. The system can bore a 1-1/4-in., 2-in., 3-in., 5-in. or 7-1/2-in. hole.

BorZit is proudly made in the U.S.A.

– manufactured, assembled and shipped directly from the factory. The basic system sells for \$269 and is shipped with a 2" bit and carry case. The tool is backed by a full one-year guarantee. If you don't save time, money and effort with our system, we'll refund the purchase price.

Contact: FARM SHOW Followup, BorZit Systems, 218 E. 3rd Street, P. O. Box 564, Kimball, Neb. 69145. For more information or a free brochure, call 800-803-8738 or e-mail us at info@borzit.com. Order online at www.borzit.com.
