

How To Reach Us

To submit a “Made It Myself” Story Idea, New Product, Shop Tip, “Best or Worst Buy”, or other information, send a note along with photos, drawings and literature, if available. We’ll get back to you later if we need more details. Send to: Editor, FARM SHOW, P.O. Box 1029, Lakeville, Minn. 55044 (ph 800 834-9665; fax 952 469-5575); email: editor@farmshow.com. You can also submit information at our website: www.farmshow.com.

To change your address, renew your subscription, take out a new subscription, order videos or books, or for other information regarding your subscription, contact: Circulation Department, FARM SHOW, P.O. Box 1029, Lakeville, Minn. 55044 (ph 800 834-9665; fax 952 469-5575; email: circulation@farmshow.com).

Shockerhitch Tongue Mount Air Hitch

This hitch is very effective at dampening out vertical impacts. At Shockerhitch we developed an air hitch that fits into the front of equipment trailers. The call at first was for the construction and landscaping industries. These companies typically use dump trucks for hauling their skidsteer and equipment trailers.

The stiff ride from these trucks is very destructive, often times breaking the tongue right off the trailer or causing heavy damage. Imagine a dump truck towing a skidsteer trailer, very brutal.

In the last few years we have seen a growing need for farm use. First a customer used one for a land roller, then came a sprayer, and next with a fertilizer spreader. One farm

operation in California uses it for pulling harvest trailers through their orchards during harvest to protect the fruit from bruising. Some farm equipment dealer uses it for delivering farm equipment to their customers. The point here is that there are many uses for this hitch.

We have a number of adapters for this product to fit many applications. Hitch adapters include 2 5/16-in. ball coupler, pintle ring, or drawbar clevis. We also have custom adapter to mate the hitch to farm machinery. This is a heavy-duty hitch that can handle loads up to 20,000lbs.

For more information go to www.shockerhitch.com or call at 701-967-8577.

K 507 Kile Thresh Bar

K 506 Kile Thresh Bar

K 513 Kile Thresh Bar

K 514 Kile Thresh Bar

Kile® Thresh Bars

Kile® high performance patented thresh bars improve rotor thresh & provide cleaner grain samples for Case IH

AFX/Specialty & small tube rotors.

The K506 bar is an all purpose bar. Its extended rasped ramp, begins rasping sooner allowing more crop to rub on itself. These deeper and wider rasps, on each bar, are aggressive yet gentle on the crop, allowing the material to be managed thru the threshing/separating system. K507 extended rasp spiked bar is used, as needed, when cutting rice, corn & beans.

The K514 small tube extended rasp bar is the all purpose bar for small tube rotors, used for small seed and grain to corn and beans. The K 513 small tube spike bar is

available with or without a carbide tip. The carbide tip dramatically extends the spike wear. This is the go-to bar for rice.

Spike Kile® Thresh Bars are noted for the following features:

- High performance bars for Case IH rotors
- Reduce over-threshing
- More surface area for exceptional crop feeding
- 30-50% larger surface area per bar than OEM
- 40 degree ramp angle
- Enhances the separation of material for a cleaner tank sample

- Aggressive feeding yet gentle on all crops
 - Made in the USA of cast chrome alloy (high impact resistant) excellent wear ability
 - Spike bars, with carbide, maintain spike integrity
- Visit Kile’s website for prices, dealer list, & other bars.
