

Water-driven, self-cleaning screen is designed to work in water as shallow as 4 in.

Self-Cleaning Shallow Water Screen

Anyone who depends on surface water for irrigation will be interested in this self-cleaning screen that's designed to work in water as shallow as 4 inches.

"It draws water that's only 2 inches below the surface, which is usually the cleanest water. There's nothing else on the market that can pump out of such shallow water and also clean itself at the same time," says inventor Bob Wietharn.

The Riverscreen floats on four pontoons and draws water from more than 35 sq. feet of screening area. Water is delivered through a pipe available in 4, 6, 8, 10, or 12 inch diameter with 150 gpm to 4,000 gpm capacity. A screened rotating drum is supported by an aluminum frame that mounts on the pontoons. Flowing water moves past a series of paddles, which force the drum to rotate while a stainless steel spray bar mounted inside the drum cleans the screen.

An optional electric drive can be added for use in extreme conditions such as manure lagoons. Also optional is a galvanized lift boom that lets one person quickly swing out and gently lower the Riverscreen to the water surface.

Mouth Spray For Dogs

Assure mouth spray for dogs is a game changer. Susan Sinclair, who developed the patent-pending spray, says it eliminates plaque and gingivitis, freshens breath, and is totally safe.

"Just lift a side lip and spray to let it spread through the mouth," Sinclair says.

She developed the spray because she wasn't satisfied with available options. With her background in environmental health and much research she came up with a formula that includes ginger extract, colloidal silver, peppermint extract and natural flavors in purified water.

Sinclair tested it on Sugar, one of the Shiba Inu dogs she breeds. After spraying Assure in Sugar's mouth every couple of days for 4 weeks, she compared it to a photo she took when she started.

"You can see where the plaque - the dark color - has gone down. After a year there was no plaque," Sinclair says. "Assure loosens up the plaque so it comes off naturally. And you will notice a difference in the dog's breath within an hour."

Assure sells for \$24.99 for a 2 oz. bottle, which can last 6 to 8 months depending on the dog breed. Small dogs only require one squirt, while larger dogs, such as Great Danes need up to 4 squirts. Sinclair suggests daily doses to knock down gingivitis, but every other day or every third day is enough to take care of plaque.

Sinclair sells Assure through her website and on Amazon and has watched interest grow through her satisfied customers.

Mouth spray has a neutral flavor that dogs don't mind.

America's Best Kept Secret: The Empress Splendor Tree

Have you heard about the tree available to farmers and landowners at no cost, that will grow taller than you in its first year, produce valuable hardwood lumber in only 10 years, AND can restore soil depleted by pine or other crops?

The Empress Splendor tree

Introducing the Empress Splendor (*Paulownia fortunei*) tree.

This remarkable and beautiful tree is the world's fastest growing tree (Guinness Book of World Records), and will regrow from the stump multiple times after harvest providing ongoing revenue potential for up to 70 years.

World Tree partners with qualifying farmers and landowners by providing free Empress trees, training, and education over the 10-year growth cycle. World Tree also arranges for the harvest of the trees, and in the end, splits the profits from the sale of the lumber 50/50.

This is a tremendous opportunity for people with qualifying land in the Southeast and Pacific Northwest. Check the website to find out more and get in touch today: worldtreefarmers.com
