

Geno's Garage Specializes In Ram Diesel Truck Parts And Accessories

If you own a Dodge Ram diesel truck, this is the company to know.

For the past 27 years, Geno's Garage has provided Ram Turbo Diesel pickup truck owners with quality products, solutions, and technical resources specifically for Ram Cummins 2500/3500/4500/5500 and Ram 1500 EcoDiesel trucks. As a family-owned mail order truck parts business, Geno's has firmly established themselves as a well-known and trusted source for parts and accessories for 1989-2024 Ram Turbo Diesel trucks, and for their technical know-how about these trucks and their diesel engines.

The business was started in 1996 in the garage of its namesake, Gene "Geno" Warren. Within 7 years the company grew into their own warehouse space, where they continue to grow today. Today, Geno's Garage employs 15 full-time staff members. Many of their staff are Ram diesel owners and all of them are diesel truck enthusiasts.

Remember, Dodge Ram Turbo Diesel-specific parts is all they do. If you have questions about what to buy or how to install it, they have a team of knowledgeable tech staff who actually answer the phone when

you call (yes, that's unusual these days!), and who can help you with troubleshooting and product selection.

The Geno's Garage website and their 88-page print catalog currently offer over 3,000 parts and accessories for 1989-2024 Ram diesel trucks including air, fuel, and oil filters, drivetrain, fuel system, transmission, suspension and engine parts, specialty tools, seat covers, Mopar and Cummins replacement parts, aftermarket brands, and much more. To request a print catalog be mailed to you, you can call them or visit their website. Speaking of their website, they have a library of technical resources for your truck including installation instructions, technical tips, and their "Shop Talk" blog where you can search by keyword for technical articles.

Geno's Garage is located at 1150 Samples Industrial Drive, Cumming, Ga. 30041 and is open Monday-Friday from 8:30 AM to 5:30 PM EST. They can be reached at 770-886-2500 or you can visit them anytime at www.genosgarage.com.

"The Silencer" Saves Rake Teeth

"We bought a new rake and didn't want to destroy it in corn stalks," says Sultz. "We came up with The Silencer as a way to reinforce the rake teeth and dampen the vibrations as the teeth come off ground contact."

The Silencer consists of 1-piece plastic bands that slip over the teeth and bolt together on the ends.

"If the teeth are in good shape, installing The Silencer takes about 5 min. per wheel," says Sultz.

Sultz says the bands reduce damage in rough conditions. They also enhance the aggressiveness of the rake teeth in hay fields.

"We've had customers who were breaking 100 teeth a year report they are down to virtually none," says Sultz. "We've found the teeth don't skip over as much hay in the field, and they are much quieter as they flex over the ground."

The Silencer is priced starting at \$55 per wheel depending on model of the rake.

Norseman Planter Gauge Wheel Arms Are Built To Last

"Our Norseman gauge wheel arms for planters will outlast any gauge wheel arm on the market today," says Tim Hoehn, S.I. Distributing, Spencerville, Ohio. According to Hoehn, the cast replacement arms feature a double-roller bearing that stays tight and withstands abuse unlike OEM threaded bushings.

Norseman replacement gauge wheel arms come with sealed double-roller bearings that stay tight and withstand abuse.

Since 1980, Norseman is a family owned and operated company in Australia. The Norseman gauge wheel arms, that are distributed by S.I. Distributing, are made in the USA, with the same standard of excellence.

The Norseman gauge wheel arm kits for John Deere XP, XP Pro, MaxEmerge 5, and ExactEmerge planters sell for \$159. The Norseman kits are now available for Kinze 3000 and 4000 series planters and sell for \$189. Each kit includes 2 arms and hardware for a single row.
