EZ-360: Long Lasting Emergency Lighting Solution, Now Motion Sensing

Are you prepared in case of an emergency power outage? You may feel frustrated with the lack of quality and long-lasting emergency lanterns on the market.

But, you don't have to be.

Over 6 years ago, KC Innovations set out to create a versatile, heavy-duty, and convenient lamp that operates off your favorite tool battery. Then a need arose for a light that only switched on when needed.

Enter the motion-sensing EZ-360.

With exterior, adjustable on time, light sensitivity, and distance controls, you can fine tune the settings of the Motion EZ-360 to perfectly suit your needs.

A 3-way on-auto-off switch allows you to choose between motion sensing, always on and off functions.

Now, when you walk into that dark, gloomy

closet or basement, there'll be no more reaching blindly in the dark to find a flashlight or a light switch; the motion-sensing EZ-360 will come on automatically, saving you from bashed shins and stubbed toes!

With a 180 degree swiveling bracket, the Motion EZ-360 can be hung up-side down from the ceiling or set right side up on your countertop or the floor so you'll always have the optimal light distribution. The rotating bracket is made of powder-coated steel for durability and quality.

The Motion EZ-360 is made in the USA at our Middlebury location with the highest quality parts and raw materials. The blinker/shutoff board protects your expensive tool batteries from overdrawing and ruining them.

All EZ-360s fit up to a 30-watt KC bulb and up to a 20 watt of other brands. Add your 10-30V bulb of choice from our ultra-efficient LED dust-proof bulb line. Sizes available include 5, 10, 15, 20, and 30 watt and dimmable bulbs in 10, 15, 20, and 30 watt.

With market-best efficiency at 150 lumens per watt, run times are not sacrificed for bulb brightness. On a 5 Ah battery, the 15-watt bulb will run for about 8 1/2 hours,

while the 30 watt will run for around 2 3/4 hours.

A 1-year warranty covers the motion-sensing EZ-360 from manufacturing defects to give you peace of mind.

The motion-sensing EZ-360 is available in Makita or MALT (Milwaukee/Dewalt).
