

“Invaluable Land Clearing Tool”

Brushshark's fast cycle time makes quick work of clearing brush and trees up to 8" in diameter.

The Brushshark Tree Shear will quickly shear 1/2 to 8-in. diameter trees and brush at ground level. Each cycle takes approximately 1 second and it shears in both directions. Trees and brush up to 3 in. diameter are sheared in one cycle. Material larger than 3 in. diameter, up to 8 in., is efficiently sheared with multiple cycles.

All types of trees and brush can be cleared with the Brushshark. From hard mesquite or cedar to soft saplings. We have yet to find a material that Brushshark will not shear.

Due to the low profile shear plate design, the Brushshark also performs well clearing fence lines, easily clearing the bottom wire. The Brushshark is operated on skid

steers and most tractors with auxiliary hydraulics rated at least 8 GPM.

The rock solid Brushshark is made in the USA and has been commercially available since 2003.

Multiplaz 3500 Welder Cutter Uses No Gas

Gas welders get the job done, but once you try the Multiplaz 3500 welder, you may never go back. The 3500 uses a water-alcohol mixture to weld, solder, braze, harden, and cleanse steel, aluminum, copper family metals, cast iron, and more. The included plasma cutting torch will cut most metals including high-alloy and stainless steel, as well as non-conductives like ceramic, brick, quartz, and concrete.

Patricia Hansen, Multiplaz North America, points out that the hand operated welder comes with two torches to cover fabrication processes of welding, brazing, soldering, and cutting. She adds it operates on 115/220 power, while requiring 3 oz. water for cutting or alcohol/water mixture for 12-30 minutes usage for cutting or welding. The unit works with ferrous and non-ferrous metals, and can deliver to 3/8 in. cutting depth, while weighing 30 lbs. set weight.

On 220v, users can get 3/8" cuts and weld faster than 115v capability. Mode 1 allows processes such as brazing soldering, and gas welds, while Mode 2 delivers arc welds, and tig type welding.

Multiplaz has been selling throughout the world since 2008. In the U.S. market, it's received numerous awards, including Premiere Top Ten Product awards at the Tulare Farm Show, Sema, and the Santa Monica Green awards. Users note few alternatives with its size, versatility, and capability.

Pricing has changed since the global crisis. However, Multiplaz will eliminate the cost of tanks, compressors, and gas.

Portable Power Bench® Makes Work Easier

Are you tired of working on your knees? Out of space or wanting to get things done faster? Then the Power Bench® can help. The Power Bench is a heavy-duty portable workbench that stores in the size of a stepladder and rolls on 2 wheels. In less than 1 minute you can set it up, far faster than you can clean off your old workbench. Plus it goes where you want it.

www.powerbench.com

The Power Bench is adjustable in height with spring-loaded pins from 30 to 41-in. for your comfort. It's extremely durable and the only portable workbench that's strong enough to hold 2 7/8-in. oil field pipe. Watch videos of how easy it works at Lee Unlimited's new improved website at www.powerbench.com.

Free Shipping and \$100.00 discount on Power Bench® Packages off website pricing at checkout when adding code FSM24 offer good thru 03/31/24. Website: www.powerbench.com
