

PPS Premium Complete Flange Bushing Rebuild Kit Eliminates All Areas Of Unwanted Movement In Parallel Linkage Arms

“Our premium complete flange bushing kits eliminate all areas of unwanted movement in parallel linkage arms. This two-bushing system collectively prolongs overall wear life and eliminates wear in the parallel arm holes, resulting in less planter maintenance and long-term savings,” says Dave Burgei of S.I. Distributing in Spencerville, Ohio.

He credits the idea for the flange bushing kit to Ron Jackson and his son Cody, who farm near New Boston, Mo.

According to Burgei, worn parallel linkage arms and bushings are a common problem with today’s planters. Since the implementation of down-pressure enhancing products, this problem has only gotten worse. “In the past, worn parallel linkage arms and bushings have always had to be replaced with new and expensive ones,” says Burgei. “With our kits, there is no longer any wear on the parallel arms. All of the wear is on the kit’s replaceable parts.”

PPS Premium Complete Parallel Kits come with upper and lower parallel arms

The PPS Complete Parallel Arm Kit comes with upper and lower parallel arms, that already have the hardened flange bushings installed, as well as the hardware, to eliminate all areas of movement in the parallel arms.

with pre-installed hardened flange bushings, according to Burgei. “These kits feature robust welded steel arms, designed to handle excessive down pressures and adverse planting conditions. The premium complete kits are the best option for optimal planter repair,” Burgei said.

“The PPS Rebuild Your Existing Arms Kits are an excellent option for reduced costs to make current parallel linkage arms better than new. The installer reams out the existing worn hole in their existing arm a little larger for a more precise fit for the bushings.” PPS rebuild kits are available for

PPS Rebuild Your Existing Arms Kit.

Case-IH, John Deere, Kinze, New Holland, Precision Planting, and White/Massey Ferguson planters.

Extend the Life of your Machinery

Built to last since 1948.

LUBRICATION EQUIPMENT FOR FARM AND AGRICULTURE MACHINERY

BEST IN CLASS WARRANTY PROTECTION • FREE SHIPPING • EASY ONLINE ORDERING

BATTERY OPERATED OIL PUMPS

The BOP product line has changed how oils, coolants, & ATFs are dispensed.

No Air, No Hand Pumps, No Spillage, No Kidding!

FUEL EQUIPMENT

Trusted for years in the demanding Australian farming segment, these high flow fuel pumps are durable & built to last.

Premium Grade Auto Shut-Off Nozzle.

GREASE EQUIPMENT

Best-in-class performance Grease Guns, Pumps & Reels.

Used in the toughest, industrial, agriculture & transport segments.

Macnaught high performance lubrication and dispensing equipment designed and engineered in Australia, has been serving the Agriculture, Mining, and General Industry markets since 1948.
