

Deere combine before Color Back treatment

Combine after treatment

## “Color Back” Paint Renewer

Color Back has been putting smiles on customers’ faces for over 38 years.

The clear acrylic liquid, with special chemicals and UV inhibitors, is sprayed on to bring faded paint back to its original color tone and luster and shine. No rubbing or polishing is required. And Color Back lasts for years!

It is pliable, so it can be sprayed over belts, hoses, rubber moldings and most any equipment item but glass. It also rejuvenates faded decals.

Color Back comes in aerosol cans or gallons, and is shipped via UPS ground.

A gallon will do the average size, self-propelled combine, or four wheel drive tractor.

Color Back is used throughout North America by implement dealers, farmers, industrial dealers and individual equipment owners.

### Diesel Fuel Problems? Frosty Weather Can Cause Gelling for Blended, #1, #2, and Farm Blended Fuels

#### STOP FUEL GELLING

Keep storage tank flowing and Engines running. No Additives. No Blending.

#### Featured Products:

##### Plugged Diesel Fuel Filters

FOR BULK STORAGE TANKS in cold weather are kept open and fuel flowing with the Universal Bulk Tank Filter Preheater wrapped around the filter. 120v

##### Vehicle, Compressor and Generator

diesel fuel problems in cold weather like hard starting, low power, no power solved with Universal Fuel Filter Preheaters wrapping around the filter to keep the diesel fuel flowing. 12v and 24v and 120v and 240v combination voltages 12v/120 and 24v/120.

#### Cold Weather Oil Problems -

solved with Universal Peel N Stick Preheaters for oil pan & hydraulic tank & gear box. Maintains a steady hot oil temperature in the housing during coldest weather. 120v and 240v

Universal PREHEATERS

## Super Tarp Protects Bales

Instead of building expensive sheds, Rocky Meadow Farm offers the Super Tarp as a solution to protect hay and straw bales. The tarp stands out from others in a couple of ways.

First, it is made with 7 1/2-oz. waterproof, UV-resistant fabric with the strongest tensile strength available. Its silver exterior reflects sunlight and the white interior reduces the temperature 15 to 20 degrees. But it’s the full-length sleeves on the sides that really set the tarp apart.

Grommets tear out, says Steve Musser, owner of Rocky Meadow Farm, but the sleeve distributes the stress more evenly. The sleeve can hold up to a 3-in. diameter pipe - metal or pvc - and has cut-outs every 3 ft. for tie-downs.

Rocky Meadow Farm offers the tarp in 36 and 48-ft. lengths in widths from 20 to 33-ft. The company website has a chart to show the width needed according to round bale sizes. (They also work for square bales.) Prices range from \$154 to \$384.

The tarps, which are sold throughout the U.S. and Canada, can be ordered online or by calling the company.

The tarps typically last three to five seasons and offer a good alternative to building a shed and paying property taxes, Musser says.
