

INSTALLS ON ANY KITCHEN SINK

Handy New Hot Water Dispenser

"You have better things to do with your time than wait for the water to boil," says the manufacturer of In-Sink-Erator, a handy new hot water dispenser that gives you tea-kettle quality water instantly with just a twist of a tap. No waiting at all.

The unit's one-half gal. tank refills as fast as you use it, providing up to 60 cups of 190° water per hour. "With this new In-Sink-Erator, you heat only the water you actually use," the manufacturer points out. Suggested uses are for warming baby bottles, hot water bottles, pie fillings, thawing frozen foods, icings, melting

butter, boiling eggs, or preparing instant vegetables or beverages.

The unit can be installed in the kitchen sink adjacent to the faucet. Or, it can be installed through the countertop near the sink without the bother of drilling an extra hole through the sink. The simplest installation is to use the hole in the sink available for the sink spray.

Suggested retail is \$81.00.

For more details, contact FARM SHOW Followup, Emerson Electric Company, In-Sink-Erator Div., 4700 21st Street, Racine, Wisc. 53406.

Tank of the new hot water heater dispenser mounts under sink. It provides up to 60 cups of 190° water per hour when connected to hot water line.

PROJECTS TIME ON THE CEILING

Ceiling View Alarm Clock

Compact Ceiling View clock projects time in 5 min. increments on ceiling. Projected numerals are about 4 in. high.

You're half asleep and on the closing chapter of an exciting dream. Is there time to sink back into deep sleep to finish the dream, or time to get up?

No need to wake yourself (or your mate) to find out. Just lie still and half open one eye to see the exact time displayed on the ceiling.

That's how it is with the Ceiling View alarm clock from Stancraft Products. It projects the time in 5 minute increments on the ceiling of any darkened room. Projected numerals are about 4 in. high.

If you can't make it on your own, the clock has a standard alarm to make sure you're up on time.

The digital ceiling clock shown (Model 7661) retails for \$49.95. Other models available range in price from \$29.95 to \$79.95.

For more details, contact: FARM SHOW Followup, Stancraft Products, 1621 East Hennepin Avenue, Minneapolis, Mn. 55414 (ph. 612-331-8910).

AVAILABLE WITH HAND OR ELECTRIC DRIVE

Old Fashioned Ice Cream Maker

Been wondering where you can buy one of those old fashioned, hand-operated wooden "kegs" for making homemade ice cream?

You can pick from three different "Dolly Madison" wood models just introduced by Northern Electric, Chicago.

Available with hand-crank or electric drive, there's the Williamsburg model made of early American walnut, the Pioneer which features the popular Butcher Block look and a Springfield "keg" made of 100% redwood.

Suggested retail cost of the hand-

operated models is \$28.95 for the Williamsburg, \$26.95 for the Pioneer and \$25.95 for the Springfield. All models are available with electric motor drive in 4 or 6 qt. capacity. The 6 qt. electric model comes with a see-through lid and retails for \$46 to \$48, depending on the style and type of wood used. Prices include an ice cream recipe book which comes with each Dolly Madison ice cream maker.

For more detail, contact: FARM SHOW Followup, Northern Electric Co., 5224 North Kedzie Avenue, Chicago, Ill. 60625 (ph. 312-267-5100).
