

New Donut Factory from Dazy Products reportedly makes donuts for less than 4 cents apiece, including your choice of frosting.

New from Northern Electric Co., 5224 N. Kedzie Ave., Chicago, Ill., is this six-hole unit called The Donut Bakery (Model 2081). Suggested retail is \$35.95.

Do-it-Yourself Donut Makers

"When kids see it advertised, they'll drive their parents nuts until it's purchased," predicts one retailer.

The new Dazey Donut Factory reportedly makes donuts for less than 4 cents apiece, including the frosting. Simple batter requires no special ingredients and can be premixed and refrigerated so you're ready to make hot, fresh donuts any time.

For more details, contact: FARM SHOW Followup, Dazey Products Co., 4500 East 75th Terrace, Kansas City, Mo. 64132 (ph. 816 363-6020).

It begins to look like donut makers will be the next popular new kitchen appliance.

First on the market is the Dazey two-holer called the Donut Factory. A four-holer is slated for limited availability late this year. Northern Electric (see accompanying photo) has just introduced a six holer.

It's anticipated that other major suppliers, including Hamilton Beach, Wingaersheek and Van Wyck will have electric donut makers on the market within a matter of months.

The new Crock-Plate picks up where the Crock-Pot leaves off, says Rival Mfg.

LETS THE SUN SHINE IN

Greenhouse Window for Green Thumbers

"It offers greenhouse results without the expense of building a greenhouse," says Jim Paulson, national sales manager for the new Greenhouse Window by Alenco.

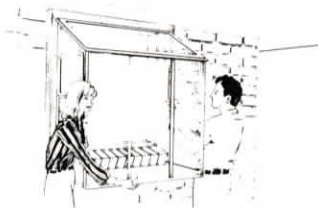

Vents on each side, complete with screens, serve as windows. The glass is double paned to minimize heat loss. Other features of the weather-tight unit include baked-on bronze or white enamel finish over all-aluminum frame construction, and adjustable mesh shelving.

"A south-facing window is the ideal location," says Paulson. "If this location provides more sun than some plants can stand, put a piece of Scotch tint over the top pane."

Available in 12 standard sizes ranging from 50 to 65 in. wide, 41 to 56 in. high and 12 to 16 in. deep. Costs range from \$290 to \$336. For

large windows, two units can be mounted side by side. Comes completely assembled and ready for do-it-yourself mounting.

For more details, contact: FARM SHOW Followup, Sunshine Environments, Jim Paulson, Pres., Suite 2, Minneapolis, Minn. 55403 (ph. 612 221-0202).

Weather-tight Greenhouse window mounts over existing window opening.

TEN APPLIANCES IN ONE

New Crock-Plate Cooks Anything

The popular Crock-pot introduced low temperature cooking in stoneware. Now comes the brand new Crock-Plate, featuring high temperature cooking in stoneware.

The new do-anything cooker does the work of ten appliances, says Rival Mfg. It's a non-stick brazier/broiler, griddle, skillet, "deep" fryer, oven, wok, steamer/poacher, omelet/crepe maker, chafing dish and warmer/server.

The Crock-Plate picks up where the Crock-Pot leaves off, says Rival. Cooks everything from fried chicken to apple fritters, sizzling steaks to delicate crepes.

How does it impart juicier, full-bodied flavor to foods?

"The secret is in the stoneware. It's made of Petalite, a rare mineral mined only in Brazil," explains Carle Shapiro, public relations manager. "There are no heating element hot spots as in an electric fry pan. Everything cooks with a constant, even heat from the center to the sides. Even when heated to 650°F the stoneware plate can be immersed immediately in cold water without cracking or shattering."

Crock-Plate is rated at 1,350 watts. Suggested retail is \$62.95.
