**MADE FROM AN OLD SILO BLOWER
FOR LESS THAN \$100**

Build Yourself A Grain Vacuum

By Mark Newhall, Managing Editor

One of the best farm shop ideas we've seen lately is this low-cost grain vacuum that Iowa farmer Roger Datisman, of Sherrill, designed and built, using an old silage blower and his 200 bu. grain wagon.

It's unbelievably simple. You can build it yourself — and for less than

\$100 if you've got an old unused silage blower sitting out behind the barn.

Here's how Datisman did it.

First, he converted his 200 bu. grain wagon into a giant vacuum chamber by installing a layer of per-
(Continued on next page)

Datisman's "reversed" silo blower, left, sucks air out of the sealed-up wagon, pulling grain up the 8-in. flexible metal tubing used as a vacuum hose.
