New Hoist Tilts Truck Box 90°

New uses for straight trucks will soon be busting out all over, thanks to a revolutionary adapter "kit" that allows most conventional 45° scissor or twin-cylinder "push" type hoists to tilt the box a full 90°. With the end setting flat on the ground, your straight truck can be used to load and handle big round bales, wet grain, water tanks, portable farrowing crates and similar type buildings, to tote machinery and engines, and dozens of other new uses.

By using a hydraulically-operated tailgate, a part of the "Hired Hand" adapter kit from Austring Enterprises, one man can load and unload a wide variety of materials right from the cab. The tailor-made tailgate is designed to fold hydraulically around the sides of the box so it's out

(Continued on next page.)
