"WEATHER WRAP" FROM LUNDELL MFG.

New Baler Wraps Bales In Plastic

Front-mounted attachment on baler automatically wraps each bale in plastic in less time than it takes a conventional baler to twine-tie big bales.

You've never seen anything like it — a first-of-its kind big round baler that automatically wraps each finished bale with a plastic wrapper.

"Our new Weather Wrap Round Baler bales easier and quicker than the conventional big round bale tied with twine," Vernon Lundell, inventor and manufacturer, told FARM SHOW. "Bale damage as a result of moisture penetration in the bottom and top of the bale is virtually eliminated."

The new plastic Weather Wrap wrapper holds the bale together during moving, loading and transport. Ends of the bale are open, permitting the bale to breathe and cure while the circumference is protected from the weather. A special provision has been made to let condensation escape during the early curing stage.

Other features on the new-style Lundell big round baler, include a new adjustable hitch, new spring-tooth type second bale maker, and

(Continued on next page)

IN THIS ISSUE:
