

PVC required for this easy chair includes 18 ft. of 4-in. pipe, pipe fittings, eight t-joints and eight 90° joints.

### INEXPENSIVE AND ATTRACTIVE

## PVC Pipe Makes Neat Lawn, Patio Furniture

If you're looking for an inexpensive and simple way to build your own lawn or patio furniture, take a look at using PVC pipe.

"PVC pipe furniture is popular for a variety of reasons. The plastic material is readily available in hardware stores, building centers and plumbing supply stores. Construction is easy, requiring only a tape measure, hacksaw and, in a few cases, a drill and a screwdriver," says F. Van Huntley, spokesman for Family Workshop, Bixby, Okl., which offers do-it-yourself plans for furniture made from PVC pipe.

Each set of plans includes a list of

materials needed, step by step instructions and detailed drawings. A set of 10 plans sells for \$19.95—which includes a brochure of tips and techniques on working with PVC pipe, and drawings and instruction on building the following pieces: patio table and chairs; serving cart; coffee table and end table; glider chair; sling sofa; easy chair; sling chair; hammock; and chaise lounge chair. Individual plans are also available for \$4.95 each.

For more information, contact: FARM SHOW Followup, The Family Workshop, P.O. Box 1000, Bixby, Okl. 74008 (ph 918 366-6532).

"Tow Bar" adapts to ordinary push mower.

## Turn Your ATV Into A Riding Lawn Mower

You can mow grass with your ATV using an ordinary push mower thanks to a new adapter kit from TAW Corp., Vicksburg, Miss.

The push mower adapter is one of four accessories that fit into a tow-bar tongue that mounts permanently on the ATV. The TAW tow bar easily adapts to both 3 and 4-wheelers, lifting the front axle off the ground for over-the-road towing.

To attach the push mower bracket, you simply slide out the tow bar tongue from the permanently mounted bracket on the ATV and slide in the push mower

assembly. The mower bracket adapts to 22 or 24-in. decks. Four chains from the mower bracket suspend the mower deck off the ground, keeping the wheels in mid-air. Chains can be adjusted up and down to alter length of cut.

The tow bar sells for \$119.95 and installs with 4 bolts. The add-on mower bracket sells for an additional \$69.99.

For more information, contact: FARM SHOW Followup, TAW Corp., P.O. Box 811, Vicksburg, Miss. 39180 (ph 601 636-3663).

### COMES ON ONLY WHEN NEEDED

## Yard Light Turns On When It "Sees" Visitors

If you don't like the idea of leaving a farmyard security light on all night, you'll want to take a look at this new light switch that only comes on when it "sees" the headlights of an approaching car or truck.

R.B. Harris, president of GRH Industries, invented the light when he moved into a rural home. "We wanted to be able to light our way to the car at night but we didn't want to have a light on all night or even while we were gone in the evening. There are other auto switches on the market but because they're activated by noise or movement, they can come on accidentally. This switch comes on only when it sees your headlights, or when you flip the switch manually, and then shuts off automatically after 6 min.," says Harris.

The new switch wires into the existing switchbox for your yard or porch light. It's equipped with an electronic eye that installs facing the driveway so that headlights strike it. During the day it "deactivates" itself. Manual switches can be mounted wherever convenient.

"We've had interest from farmers who want to install them around barns and livestock shelters so that when they approach at night with a truck or flashlight, the lights come on automatically," says Harris.

"Nite-I" sells for \$38.

For more information, contact: FARM SHOW Followup, GRH Industries, Rt. 2, Box 121-A, Elon College, N.C. 27244 (ph 919 584-4460).

## "Back-Saving" Handle Makes Shoveling Easy

"Once you've tried it, you'll never go back to scooping or shoveling without it," says Rodger Langemeier, Aurora, Neb., distributor of "Scoop-Eeze," a bolt-on auxiliary handle that reduces back stress and strain.

The handle -- designed for quick and easy on and off installation on scoop shovels, snow shovels, hoes, rakes and other hand tools-- pivots to allow normal shoveling motion, and features a three-position adjustment for matching length to operator height.

Made of PVC tubing, "Scoop-Eeze" weighs 1 lb. and retails for \$14.95.

For more information, contact: FARM SHOW Followup, Scoop-Eeze, Rodger and DeAnna Langemeier, Distributors, 325 Fairview Drive; Aurora, Neb. 68818 (ph 402 694-3628).
